EXPERIMENT 06

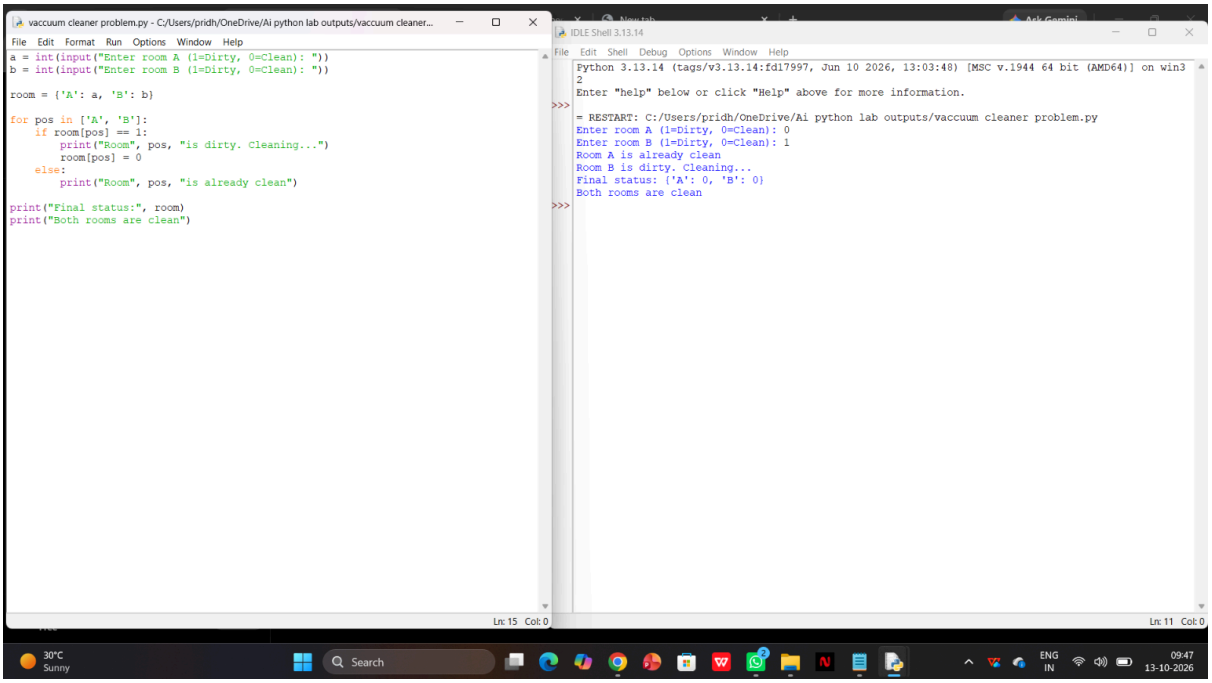

Aim:

To write a Python program to simulate a vacuum cleaner agent that cleans dirty rooms.

Algorithm:

- Initialize the rooms with clean or dirty conditions.
- Place the vacuum cleaner in a room.
- Check whether the current room is dirty.
- If dirty, clean the room; otherwise, move to the next room.
- Repeat until all rooms are clean.
- Display the final status of the rooms.

Program code and output :

Result:

Thus, the Python program to solve the Vacuum Cleaner Problem was implemented successfully.
