EXPERIMENT 11

Map Coloring Using CSP

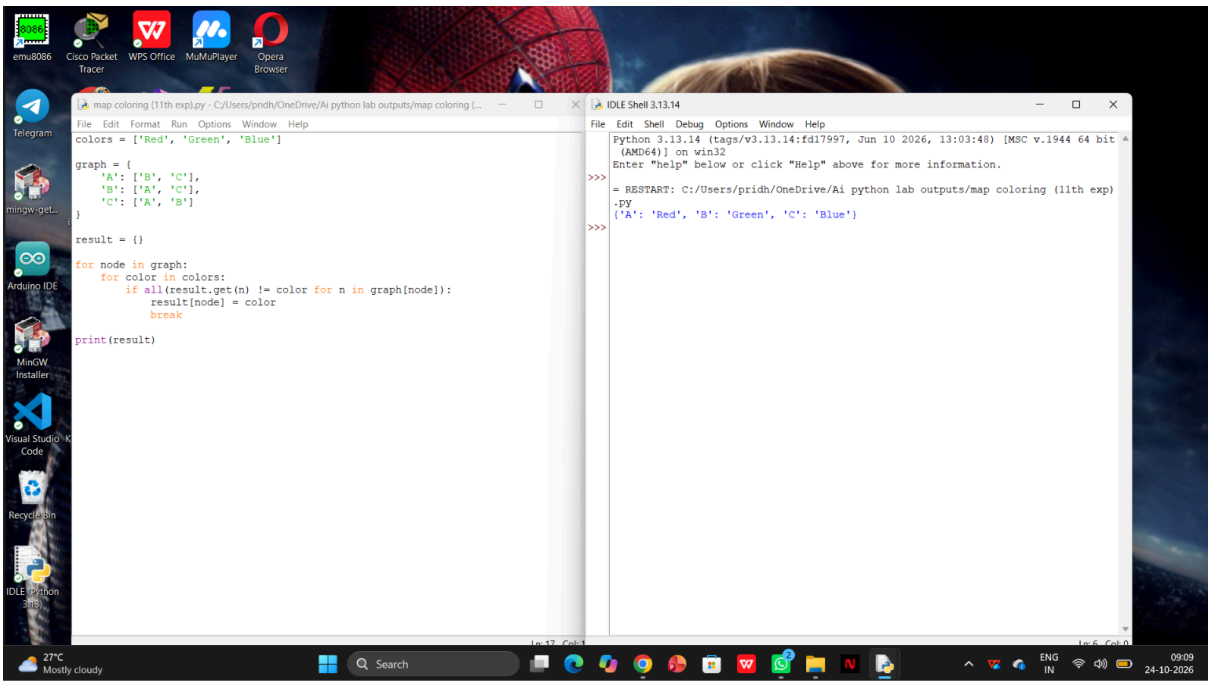

Aim:

To write a Python program to solve the Map Coloring Problem using a Constraint Satisfaction Problem (CSP).

Algorithm:

- Define the regions of the map and their neighboring regions.
- Define a set of available colors.
- Assign a color to each region.
- Check that neighboring regions do not have the same color.
- If a conflict occurs, backtrack and try another color.
- Display the valid color assignment.

Program output :

Result: Thus, the Python program to implement Map Coloring using CSP was executed successfully.
